1275 MAPLE STREET SUITE F, HELENA, MT 59601 | 406.443.3962

There are two ephemeral drainage channels that run through the subject property. It is proposed to provide storm water treatment within these existing drainage channels. No perennial streams are located within the subject property. A detailed description of the storm water management and drainage channel modifications to accommodate storm water treatment is provided in the preliminary engineering report provided with this application.
