	Description: We will completely remove the existing shingles from the house and install a new roofing system designed for long-term durability and weather protection. This includes Owens Corning True Definition architectural shingles, matching starter and hip/ridge shingles, an ice and water barrier at eaves, valleys, and other vulnerable areas, and synthetic underlayment for added moisture protection. All materials are top-quality and meet or exceed manufacturer recommendations.						
	All roof flashing will be replaced, including step flashing, roof-to-wall flashing, valley metal, and drip edge. The house's ventilation will be balanced with the existing soffit vents by installing new ridge vents to improve airflow and meet building code requirements.						
	We will trim the tree on the West side near the gutter and install gutter guards in this gutter section. The TV antenna and Satellite Dish will be reinstalled at the same locations and in the same directions. During the roof tear-off, we will use a Catch-All cover system to protect the side of the house and surrounding plants. At the end of the workday, the yard will be fully cleaned.

	Description: This permit request outlines the details for installing two wall-mounted, exterior backlit signs at the new Jersey Mike's Subs location. Here are the specifications for each sign: * **South Side Sign:** 72.6" high x 105" wide* **East Side Sign:** 49.5" high x 165" wide Both signs will be mounted to the building using 3/8" anchor bolts, as requested by NOTATEK. NOTATEK is manufacturing these signs in Salt Lake, UT, and will ship them to City Lights Sign Co in Helena, MT, for installation. The signs built by NOTATEK will include a single photo eye sensor and a service shut-off switch. City Lights Sign Co has been subcontracted by NOTATEK specifically for the permitting and installation processes. Our agreement with NOTATEK stipulates that they are responsible for either directly contacting permitted electricians for sign wiring or arranging for City Lights Sign Co to hire them for the electrical hook-up. As of now, City Lights Sign Co has not received a request to facilitate the electrical connection for these two signs. We did reach out to the electrician for this location on June 11, 2025, to inquire about power availability near the sign installation sites. At that time, the electrician mentioned he was still making changes to the permit and would ensure wiring to the sign locations was noted. It is currently unknown if this has been completed. Finally, the valuation for this permit is based on City Lights Sign Co's estimated sign costs. We are charging \$1,890.00 for the installation of these signs and do not have further knowledge of the overall cost of the entire sign project.
