	<p><i>Description: The proposed project consists of the addition of a new CT machine for the St. Peter's Health Medical Group North Clinic. The new suite will receive new paint, flooring, ceilings, artificial sky ceilings and casework. The existing space is already lead lined and it has been decided to leave the existing control room wall (lead lined) with shielded window in place. New cabinets in the existing control room will replace what is currently in place. The existing CT room is plumbed for an exam sink to be included along with additional casework. In order to install the CT in the clinic, an existing opening ("plug") in the north side of the clinic will be opened and then closed again. SPH has requested that windows be installed above the plug and it is suggested to be above the 7'-0" AFF height so that shielded windows are not necessary. Finishes will match St. Peter's Health current finish standards.</i></p> <p><i>This addition will require modifications to the cooling equipment currently being used to serve the adjacent mechanical room as well as the lab space. New cooling equipment will be provided within the project documents to serve the mechanical room, the lab as well as the CT scan and control rooms. Existing medical gas services that are no longer in service will be demolished, and no new services are anticipated.</i></p> <p><i>Site specific vendor drawings to be included with CD package for pricing and installation.</i></p>

<i>Description: The proposed project consists of the design for renovation of approximately 6,400 sf two-story office building on N. Last Chance Gulch in Helena, MT. Demolition scope will include full interior demolition of non-structural elements, finishes and systems. This phase of the project will allow the design team to get to the bare bones of the building and further direct the design. A full tenant fit out submittal will follow, roughly the end of February.</i>
